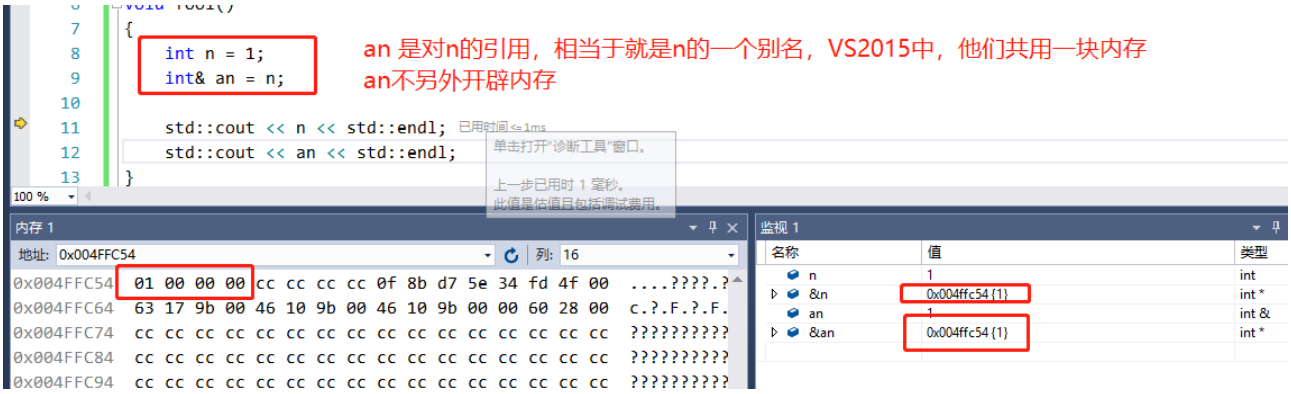
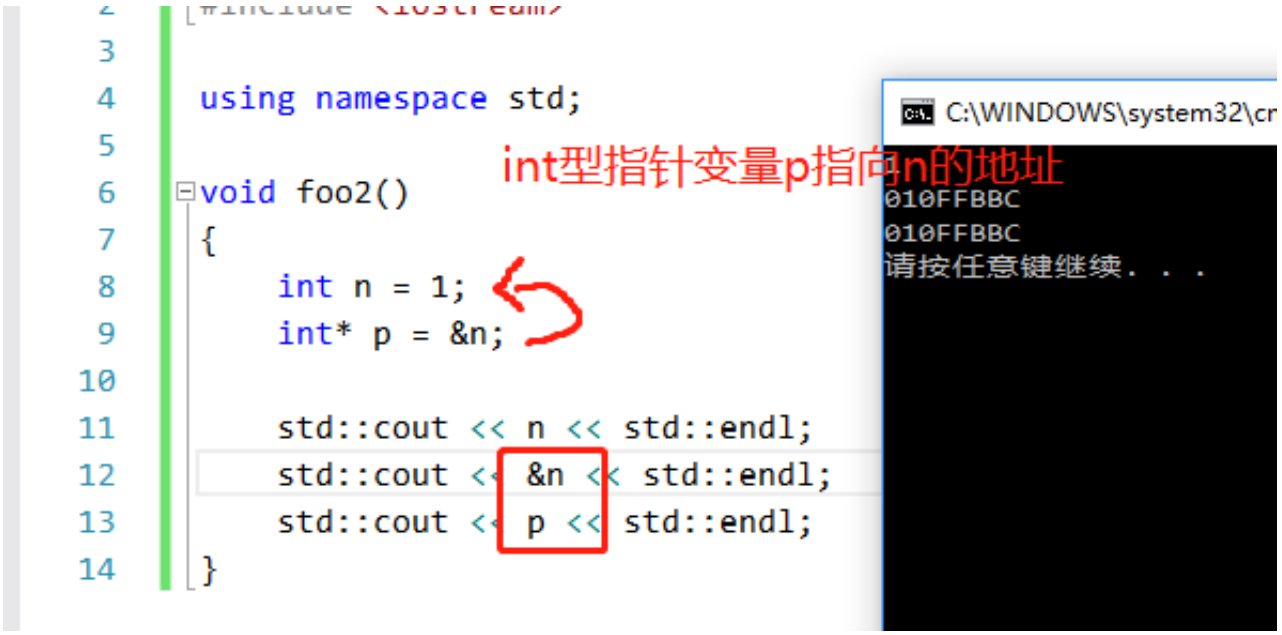
具体代码见homework，这里仅记录一些现象。

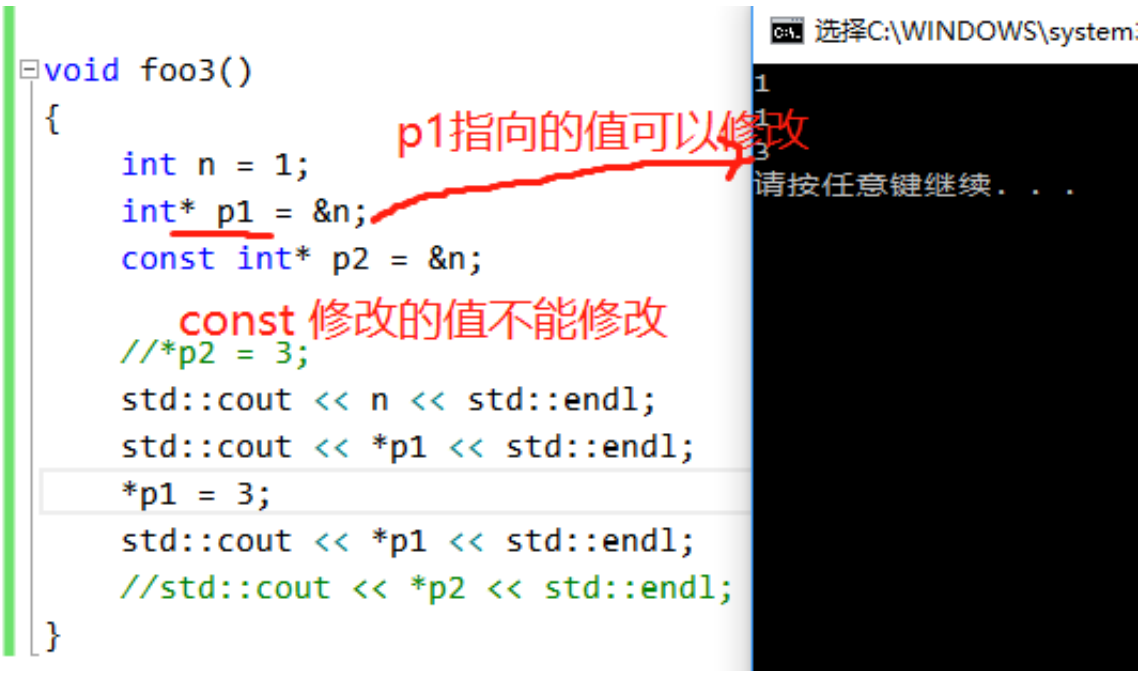
1 举例说明int和int&类型不同



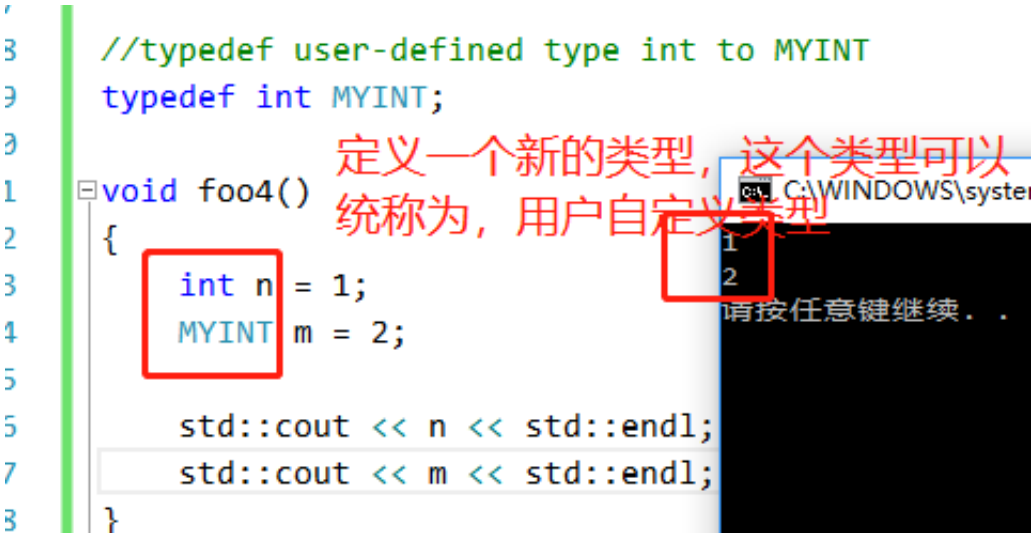
2 举例说明int*和int&类型不同



3 举例说明type和*const type*类型不同



4 举例说明typedef int MYINT类型



5 举例说明重载函数的调用二义性问题

```
5
6   using namespace std;
7
8   int getValue()
9   {
0       return 1;
1   }
2
3   float getValue()
4   {
5       return 1.0;
6   }
7
8   void foo5()
9   {
0       getValue();
1   }
```

6 举例说明const int&可以传常量

```
6   using namespace std;
7
8   void foo6()
9   {
10      const int& n = 10;
11
12      std::cout << n << std::endl;
13      std::cout << &n << std::endl;
14  }
```
